Yashwanth Katta
Full Stack Developer

Phone: 361-228-9024| Mail: yashwanthreddykatta218@gmail.com

PROFESSIONAL SUMMARY

- Having **6 years of professional IT experience** in designing and developing multi-tier distributed enterprise applications using **Core Java, J2EE** technologies, following the **Software Development Life Cycle (SDLC)**.
- Experienced in various stages of SDLC including **requirement gathering, analysis, design, development, implementation, integration, documentation, testing,** and **deployment**.
- Skilled in developing applications using **Agile Methodologies (SCRUM, XP)**, **Waterfall**, and **Test-Driven Development (TDD)**.
- Hands-on experience in front-end UI technologies such as **HTML5, CSS3, jQuery, JSON, Ajax, Next.js, Backbone.js, AngularJS, Angular (2/4/6), Node.js, Bootstrap, React.js, Tag Libraries,** and **JSTL**.
- Strong knowledge of **Java 1.8** features such as **Streams**, **Lambda Expressions**, and **Functional Interfaces**.
- Expertise in **Core Java**, with a solid understanding of **Garbage Collection, Collections Framework, Multithreading, Event Handling, Exception Handling,** and **Generics**.
- Worked with **Streams API** and **Parallel Streams API** for enabling parallel processing of collections in distributed environments.
- Proficient in developing **J2EE enterprise applications** using **Service-Oriented Architecture (SOA)** and **Microservices Architecture**.
- Implemented **SOA services** with **Microservices architecture** using **SOAP** and **RESTful APIs**.
- Independently integrated multiple **REST APIs** and implemented new features using **React** and **Angular** stacks.
- Experienced in understanding and implementing **REST API Microservices** in client-server business applications.
- Expert in building **Microservice applications using Spring Boot** for developing **RESTful web services**.
- Hands-on experience developing web applications using **Spring Framework modules** — Spring IOC, Spring AOP, Spring MVC, Spring Security, Spring Boot, Spring Batch, and Spring Data.
- Expertise in **J2EE technologies** — Servlets, Struts, Spring, JDBC, JTA, JPA, Hibernate, and JMS.
- Strong understanding of design patterns including **Singleton, Factory, Prototype, Business Delegate, Session Facade, Service Locator, Visitor, Observer, Decorator, Front Controller, DAO,** and **MVC**.
- Skilled in designing and implementing multi-tier applications using **Spring MVC** and **Spring Boot**.
- Extensive experience developing **Microservices** with **Spring Boot** and **Netflix OSS (Eureka, Hystrix)** while following **Domain-Driven Design (DDD)** principles.
- Used **SOAP UI**, **Postman**, and **Advanced REST Client** for testing web services.
- Experienced in **CI/CD pipelines** and build/deploy tools such as **Jenkins** and **Docker** for continuous integration and deployment of microservices.
- Proficient in developing and consuming **REST APIs** with **Kubernetes**, **Java**, and **Spring Boot**, including API documentation tooling.
- Strong experience with **Postman** and **SOAP UI** for web service testing.
- Worked on designing and developing scalable **Web Service platforms** and **APIs** using **REST** and **SOAP** with technologies like **AXIS, WSDL, UDDI, XML, JAX-WS, JAX-RS, JAXB, JAX-RPC**, and **Jersey** frameworks.
- Expertise in **XML technologies** such as **XSL, XSLT, XML Schemas, XPath, XForms, XSL-FO**, and parsers like **SAX** and **DOM**.
- Good understanding of databases such as **Oracle, MySQL, SQL Server, NoSQL, MongoDB,** and **IBM DB2**, including management of **tables, views, indexes, sequences, stored procedures, functions, triggers,** and **packages**.
- Experience in **JMS** messaging to enable reliable and asynchronous communication for enterprise applications using **ActiveMQ** and **RabbitMQ**.
- Skilled in performing **CRUD operations** using **Java**, **MongoDB**, and **Cassandra**, and in writing complex **SQL queries** and **stored procedures**.
- Proficient in both **SQL** and **NoSQL** databases such as **Oracle**, **MySQL**, and **MongoDB**; expert in writing **SQL queries, stored procedures, functions, indexes, triggers, dynamic SQL, views,** and implementing **error handling**.
- Hands-on experience with **Docker**, **Kubernetes**, **IBM Cloud**, **API Connect**, **GraphQL**, and **ReactJS**.
- Proficient with build automation tools such as **Gradle**, **Maven**, and **Ant** for efficient builds and deployments.
- Experience working in **Cloud Computing environments** such as **Amazon Web Services (AWS)**, managing **EC2**, **S3**, and **VPC** resources through the AWS Console and API integration.
- Experienced with multiple IDEs including **Eclipse**, **RAD**, **Spring Tool Suite**, and **IntelliJ**, and deployment using application servers such as **Apache Tomcat**, **WebLogic**, **WebSphere**, **GlassFish**, **Camel**, and **JBoss**.
- Skilled in writing **unit tests** using **JUnit** and **Mockito**, and leveraging **Log4j** for application logging and debugging.
- Experience working with **UNIX/Linux shell scripting** and deploying applications on servers.
- Proficient in **Kubernetes** for automated and rapid deployment of containerized applications.
- Familiar with version control systems including **Git**, **TortoiseSVN**, and **Visual SourceSafe**.
- Strong **communication** and **analytical skills**, with a proven ability to multitask, work independently, and collaborate effectively in team environments.

TECHNICAL SKILLS

Languages	C, C++, Java, J2EE, SQL
Enterprise Java	Java, J2EE, Swing, RMI, Sockets, JDBC, Servlets, JSP, JMS, Java Beans, JSTL, JSF, Struts, EJB, Spring, JTA, JNDI and JPA
Web/XML Technologies	HTML5, CSS3, JavaScript, Reacts, jQuery, BackboneJS, AngularJS, NextJS, Angular8/11, BackboneJS, ReactJS, XML, XSD, XSL/XSLT, SAX/DOM, AJAX, JSON, DOJO and NodeJS.
Tools & Framework	Struts, Hibernate, Spring MVC, Spring Web Flow, Spring IOC, Spring AOP, JMS, JSF, Log4J, SOA, Jasper reports, Spring Boot, Spring Batch, Spring Security, Spring Data, Google Web Toolkit, Jersey.
Web services	SOAP, RESTAPI, UDDI, WSDL, JAX-RPC, JAX-RS, JAX-WS, JAX-B, Micro services, Apache Axis and Apache CFX.
Web/App Servers	Web Sphere, WebLogic, Apache, Tomcat, Camel and JBoss.
Database	Oracle, SQL-Server, MySQL server, MS SQL, IBM DB2, MongoDB and NoSQL
Development Tools	Eclipse, RAD, Spring Tool Suite (STS) and IntelliJ
O-R mapping	Hibernate, JPA and JTA
Testing Tools/ Others	JUnit, SoapUI, Postman, Putty, Rational Clear Quest, RTC, Load UI and JIRA
Version Control	GIT, CVS, SVN, Rational clear case and Star Team
Platforms	Windows and UNIX
Cloud Technologies	AWS (Amazon Web Services)

Client: Texas Parks & Wildlife **Jan'23 – Present**
Role: Full Stack Java Developer
Responsibilities:

- Migrated the **Boat Titling & Registration (BTR)** system from **Create React App (CRA)** to **Vite**, reducing build times by over 60% and improving HMR performance for local development.
- **Architected reusable frameworks** in Java 21 / Spring Boot 3.4 to standardize microservice creation, reducing boilerplate setup time by >40 % across new feature teams.
- **Led end-to-end modernization** of the Boat Titling & Registration (BTR) system — migrating frontend from CRA to Vite and React 19, and backend from Java 11 → 21 with Spring Boot 3.4, enabling concurrent rendering and virtual thread performance gains.
- Led UI development for state-level enterprise apps using Angular (v7–11) and TypeScript, building SPAs with responsive design and reusable component libraries.
- Delivered full-stack enhancements on Java EE platforms, integrating front-end Angular apps with RESTful web services in Spring Boot and JBoss.
- Collaborated closely with **UX designers and product managers** to implement WCAG 2.1-compliant features, including ARIA attributes, keyboard navigation, and screen-reader-friendly layouts.
- Refactored legacy UI components to meet **accessibility (a11y)** standards using semantic HTML, proper tab order, color contrast checks, and automated testing with tools like Axe and Lighthouse.
- Migrated a React app from **Create React App (CRA)** to **Vite**, reducing build times by over 60% and significantly improving HMR (Hot Module Reloading) during local development.
- Modernized UI stack by upgrading to **React 19 + TypeScript**, enabling concurrent rendering features and improved type safety across shared components.
- Designed and developed **reusable, self-contained UI modules** in TypeScript and SCSS, promoting DRY principles and improving code maintainability across the design system.
- Partnered with QA to validate WCAG compliance, fixing issues like duplicate labels, form control associations, and missing ARIA landmarks prior to production release.
- Created shared **form validation logic** and state management patterns in TypeScript, improving consistency across multi-step forms and dynamic content areas.
- Integrated **responsive design best practices** using Flexbox, Bootstrap 5, and custom SASS utilities, ensuring mobile/tablet compatibility across HHSC-facing applications.
- Architected and secured REST APIs using JWT, OAuth2, and Spring Security, enabling secure authentication and authorization across services.

- Converted legacy SOAP services to RESTful services and integrated them with Angular front ends, improving system performance and maintainability.
- Developed applications on JBoss EAP and IBM WebSphere, utilizing caching strategies and secure session handling for high-performance backends.
- Hands-on development using Java, JEE, JSP, Struts, HTML5, JavaScript, jQuery, AJAX, CSS3, Bootstrap, SASS, Spring, XML, JSON, Maven, and OpenAPI v3.
- Integrated Angular/React SPAs with REST APIs using shared service layers and interceptors, ensuring seamless API interaction and error handling.
- Built self-contained, testable Angular modules and Spring Boot microservices, following SOLID principles and modular design practices.
- Applied best practices in performance tuning, caching, and architecture review to improve scalability and maintainability across Java-based SOA platforms.
- Experienced in developing applications using web technologies like **Servlets, JSP, JSTL, AJAX, JDBC, JNDI, JMS, EJB,JSF, Struts, Hibernate, Spring and Web services.**
- Developed REST web services using **JAX-RS** API to send data from **Oracle** Database in **JSON** Format
- Used XML Http Request Object to provide asynchronous communication as part of AJAX implementation.
- Created various Angular Services & injected them into Angular Controllers (using Dependency Injection) to enable AJAX calls and created custom angular directives to create own HTML tags and induce functional behavior to those tags.
- Implemented back-end code using Spring Boot that handles application logic and makes calls to business objects and services mainly web services.
- Utilized data of web server using Restful web-services.
- Used Spring Boot for developing microservices, RESTful to retrieve data from client-side using.
- Microservice architecture and Pivotal Cloud Foundry (PCF) for deploying microservices.
- Used Spring Cloud, Netflix Eureka for service registry for the microservices.
- Conducted thorough testing of the chatbot application, including functional and user experience testing, and debug issues to ensure a stable and error-free application.

Environment: Core Java, J2EE, Spring 4.x, Hibernate, JSP, Restful web services, Spring Boot, AJAX, SQL, XML, JSON, HTML, Angular, aws S3, aws EC2, Java Script, Log4j, SonarQube, Maven, Apache Tomcat, Oracle DB,GIT ,Eclipse.

Client: Amazon Web Services, Tempe, AZ **Sep'22 – Dec'23**
Role: Software Developer (SDE-I)
Responsibilities:

- Involved in **Daily Scrum (Agile)** meetings, sprint planning, and task estimation for user stories; actively participated in retrospectives and presented demos at the end of each sprint.
- Developed dynamic and responsive **user interfaces** using **HTML5, CSS3, JavaScript, jQuery, Bootstrap,** and **Angular 2**.
- Utilized **Dependency Injection (DI)** features of the **Spring Framework** to inject dependencies and wire business objects effectively.
- Implemented **Spring Core Annotations** for dependency injection, **Spring MVC** for REST APIs, and **Spring Boot** for building microservices.
- Designed and implemented **generic exception handling** for all resources in the Spring Boot application.
- Developed and consumed **RESTful web services** using **Spring** and **Angular**.
- Created **SOAP-based web services** using **Apache Camel**, implementing request and response objects with well-defined routing mechanisms.
- Built the **data access layer** using the **DAO pattern** with **Hibernate ORM** for persistence management.
- Gained diverse experience in **N-tier** and **microservices architecture** applications using **Spring Boot**, **Spring Cloud Config**, **AWS**, **RabbitMQ**, **Kafka**, **Cassandra**, **MySQL**, and **RESTful APIs**.
- Developed RESTful web services using **JAX-RS** in **Spring Boot-based** projects.
- Implemented enterprise components using **Spring MVC**, **Spring IOC**, **Spring Transactions**, **Spring Security**, and **Hibernate ORM** for persistence.
- Worked extensively with **Spring Kafka API** for smooth message processing within **Kafka Cluster** setups.
- Hands-on experience in working with databases like **Oracle** and **MySQL**, including **table creation**, **stored procedures**, and **functions**.
- Strong expertise in **Spring Framework modules** such as **Spring MVC**, **Spring IOC**, and **Spring JPA**.
- Utilized **AJAX** and **JSON** to send asynchronous requests, improving server interaction and data exchange between browsers and servers.
- Developed scalable **N-tier architecture systems** using **Java 8, J2EE, JSP, Servlets, Struts, JMS, EJB, JDBC,** and **multithreading**.
- Created **automated deployment pipelines** in **AWS CodePipeline** to deploy **Docker containers** to **AWS ECS**, leveraging **CloudFormation, CodeBuild, CodeDeploy, S3,** and **Puppet**.
- Designed and implemented user interfaces using **Struts**, **JSP**, **JavaScript**, **AJAX**, and **JSON**.

- Implemented **SOA architecture** with **SOAP-based web services** using **WSDL, UDDI, XML, CXF Framework**, and **Apache Commons**.
- Worked on parsing XML files using **DOM** and **SAX** parsers.
- Developed logic to **reprocess failed Kafka messages** using **offset IDs** for message recovery.
- Implemented and deployed **Spring Boot microservices** through **Jenkins build scripts** as part of CI/CD automation.
- Configured **JBoss Application Server** for development and integration testing environments.
- Involved in **unit testing** of various application modules by designing and executing comprehensive **test cases**.
- Participated in **bug fixing** for multiple modules identified by the **testing teams** during the **integration testing** phase.
- Hands-on knowledge of **Kafka message partitioning** and configuring **replication factors** within a **Kafka Cluster** to ensure data reliability.
- Utilized **Kafka** features such as **distribution, partitioning,** and **replicated commit log service** to support reliable and scalable messaging systems.
- Implemented **Log4j** for efficient **error logging**, **debugging**, and **application tracking** through logger components.
- Worked with **Rational ClearCase** for **version control** and **ClearQuest** for **defect and issue tracking**.
- Leveraged **Apache Kafka** to aggregate **web log data** from multiple servers and deliver it to **downstream systems** for data analysis and engineering workflows.
- Configured and maintained **Kafka partitions and replication factors** for message reliability and failover management.
- Worked extensively in a **UNIX environment** for development, using **Jenkins** as a **build automation and management tool**.
- Used **Selenium** for **bug tracking and test automation**, and **Git** as the primary **version control system** for source code management.

Environment: Agile, Java, J2EE, HTML5, CSS3, jQuery, Java Script, Bootstrap, Angular2, NodeJS, Spring, Spring MVC, Spring Boot, Web services, JAX-RS, JAX-WS, Spring Data JPA, SOA, Micro services, Hibernate, Apache CXF, Apache Kafka, Docker, JBOSS, Junit, Log4j, Rational clear case, UNIX, Jenkins, Selenium, Git.

Client: Mercy Hospital, Cincinnati, OH **Feb'21 – Aug'22**
Role: Full Stack Java Developer
Responsibilities:

- Involved in **Daily Scrum (Agile)** meetings, **sprint planning**, and estimation of user story tasks; participated in retrospectives and presented demos at the end of each sprint.
- Documented detailed **technical design documents**, including **class diagrams**, **technical flow**, and **sequence diagrams**.
- Responsible for developing **business logic** using **Core Java**.
- Developed **frontend components** using **JSP**, **JSTL**, **jQuery**, **Servlets**, **HTML**, **JavaScript**, and **AJAX**.
- Created user-friendly **graphical interfaces and web pages** using **HTML**, **AngularJS**, **jQuery**, **AJAX**, and **JavaScript**.
- Implemented **Spring MVC architecture** using **JSP**, **Spring**, **Spring AOP**, and **Hibernate**; used **Spring Framework** to initialize managed beans and services.
- Integrated **Spring Security** for authentication and authorization mechanisms.
- Designed and created **data models**, generated **Hibernate mappings**, and built **domain objects** using Hibernate tools.
- Integrated **Spring with Hibernate** for seamless interaction with **MySQL databases**.
- Developed **REST APIs** for test servers using **Express Router middleware** with **MongoDB integration**.
- Utilized **Hibernate named queries**, **criteria queries**, **HQL**, **optimistic locking**, and **caching** for efficient data processing and persistence.
- Used **AWS Object Storage Containers (S3)** for storing and retrieving secure files through APIs.
- Designed and implemented **data migration strategies** and **source-to-target mappings** for migrating legacy data into **Cassandra** databases.
- Designed and hosted **SOAP-based web services** on **WebSphere Application Server**.
- Utilized **Spring Core annotations** for dependency injection and **Apache Camel** for Spring framework integration.
- Implemented **Quartz jobs** for scheduling **Spring Batch jobs** using cron triggers configured in Spring files.
- Developed **unit and integration test cases** using **JUnit**, **Cucumber**, and partially **Selenium**.
- Used **Gradle** for building and deploying web applications efficiently.
- Utilized **JIRA** for tracking user stories and sprint progress in accordance with Agile methodology.
- Applied **Log4j** for efficient logging, debugging, and error tracking.
- Developed applications using **Eclipse IDE**, leveraging its features for **editing**, **debugging**, **compiling**, **formatting**, **build automation**, and **version control (SVN)**.
- Collaborated with **Kafka Admin teams** to set up **Kafka clusters** in QA and Production environments.
- Gained practical knowledge of **Kibana** and **Elasticsearch** for identifying **Kafka message failure scenarios**.
- Implemented **Kafka producer and consumer applications** on **Kafka cluster setups** using **Zookeeper**.
- Performed **web service testing** using **SOAP UI**.
- Actively involved in **application maintenance and enhancement activities** to improve system performance and stability.

Environment: Agile, HTML5, CSS3, JavaScript, AngularJS, Agile, Struts, Hibernate, Spring, Servlets, JSP, JUnit, AJAX, jQuery, SOAP, WSDL, JAX-WS, Cassandra, Log4j, Apache POI, RESTful, MongoDB, Cassandra, PL/SQL, Apache Camel, Apache Kafka, web services,

AWS, WebSphere Application Server, Selenium, MySQL, Eclipse, Gradle, JUnit, JIRA, SVN.

Client: **Cookiegen Info Technologies PVT LTD, Hyderabad, India** **Jan'18 – Nov'20**
Role: Full Stack Java Developer
Responsibilities:

- Involved in the complete **Software Development Life Cycle (SDLC)** — including **requirements gathering, analysis, design, development, and testing** — following **Agile methodology**.
- Designed and developed **user-friendly GUIs** and **web pages** using **HTML**, **jQuery**, **AJAX**, and **JavaScript**.
- Implemented **Spring MVC** architecture and **Dependency Injection (DI)** to handle presentation and business logic layers effectively.
- Integrated **Spring DAO** for data access with **Hibernate ORM**.
- Utilized **Spring Security** for application authentication and authorization.
- Extensively used **JSON** for parsing and transferring data between client and server to fulfill business requirements.
- Designed **Hibernate mapping files** and entity relationships based on complex business logic and object models.
- Integrated **Spring** and **Hibernate** to develop backend services and data access layers.
- Utilized **XML/XSLT** for data transformation and **SAML** for **Single Sign-On (SSO)** authentication.
- Designed and maintained **configuration XML Schemas** for application consistency.
- Implemented **Spring Config Server** for centralized configuration management and **Splunk** for centralized logging.
- Deployed **microservices** using **Concourse CI/CD** and **Jenkins**; worked with **NoSQL MongoDB** for data persistence.
- Developed **Message-Driven Beans (MDBs)** for asynchronous communication using **JMS**.
- Consumed **RESTful web services** for data exchange with external interfaces.
- Implemented **role-based access control (RBAC)** using **AJAX**, **JSON**, and **jQuery** to manipulate the DOM dynamically.
- Leveraged **Spring Core annotations** for dependency injection and built **REST APIs** using **Spring MVC**, **Spring Boot**, and **Microservices architecture**.
- Prepared **test plans** and executed **unit, integration, and system testing** using **JUnit**, **SOAP UI**, and **Fiddler**.
- Worked with **containerization tools** and implemented cloud-native deployments using **Docker**, **Kubernetes**, and **Helm** for distributed systems.
- Built enterprise applications using **Spring IO**, **Spring Boot**, and **Hibernate ORM**, with **Java EE** components including **Spring MVC**, **Spring IOC**, **Spring Transactions**, and **Spring Security**.
- Developed responsive UI components using **Struts**, **JSP**, **HTML**, **CSS**, **JavaScript**, **AJAX**, and **JSON**.
- Established **database connectivity** using **JDBC** and **Hibernate ORM** with **Spring ORM** for **Oracle** databases.
- Packaged and deployed applications on **IBM WebSphere Application Server**.
- Written **Linux shell scripts** for user login tracking and system administration tasks.
- Designed and configured **Kafka topics** and clusters across multiple environments for event-driven systems.
- Implemented **Log4j** for application-level logging and debugging.
- Utilized **Maven** for build automation and web application deployments.
- Created **JUnit test cases** and test suites for unit and end-to-end validation.
- Used **JIRA** for agile sprint tracking and story management.
- Managed code repositories with **Tortoise SVN**, including **branching, merging**, and version maintenance activities.
- Designed and developed UI components using **PrimeFaces (JSF)** by **PrimeTek** for enhanced interactivity and usability.

Environment: HTML, CSS, Node.JS, JSON, XML, AJAX, jQuery, Struts, Hibernate, Spring MVC, RESTful, HQL, MongoDB, SQL, IBM WebSphere Server, Oracle, JMS, JNDI, Maven, RMI, Eclipse IDE, UML, JIRA, Tortoise SVN, LINUX

EDUCATION DETAILS

Texas A&M University – Kingsville **Kingsville - TX** **Jan'21 – May'22**

- M.S. in Computer Science, May 2022.
- Cumulative GPA: 3.6/4.0
- Graduate Coursework: Computer Communication Networks, Database Management Systems, Analysis of Algorithms, Cloud Computing, Software Engineering, Operating Systems.

CVR College Of Engineering **Hyderabad - IN** **Aug'16 – May'20**

- B. Tech in Electronics and Electronics Engineering.
- Undergraduate Coursework: Cloud Computing Applied Physics, Electrical Machines, Database Management.
- Systems, Digital Logic Design, Microprocessors and Microcontrollers, Programming.
